

CWIS – the combined water information system

a web-based application that can be tested at

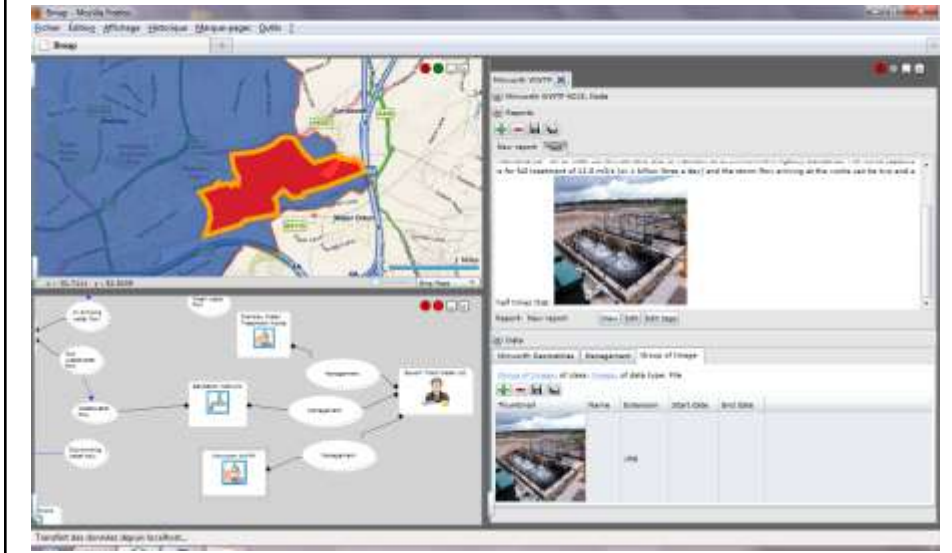

<http://home.ipogee.ch>

CWIS – the combined water information system

- A system based database
- A set of complementary data viewing/editing tools
- A linkage to simulation models

CWIS – the combined water information system

To explore the spatial, text/image and logic dimensions of information

CWIS – the combined water information system

To support learning alliances in
collaborative strategic planning process

1. Information and knowledge sharing

Accessing information, viewing data,
communication

2. Identify sounded options/strategies

Tackling complexity, including non technical elements such as
regulation, legal framework, institutional layout, financial
dimension, stakeholders, etc.

3. Evaluation of alternatives

Indicators, link to simulation models

Good news – I hear the paradigm is shifting
